International bulletin board	£60

Notes

Order book business

Order charges

- 1 Committed principal orders on SETSmm are not subject to order charges.
- 2 The tariff for order charges for covered warrants is available separately.

3 Order execution charge

The charge applies to each fill. In the case of an execution involving an iceberg order, each execution against a peak refresh is considered as a separate fill.

4 Order management surcharge

The order management surcharge applies, in addition to the order management charge, to each order event (order entry, order modification and order deletion) in excess of four times the number of automatically executed trades (fills on the Exchange trading system) during continuous trading and auctions. The surcharge is assessed separately (order events divided by trades) for each segment over the billing period.

Order events relating to iceberg orders, and committed principal orders on SETSmm are excluded from the assessment of the order management surcharge.

In assessing which order messages are eligible for the surcharge, order messages are counted in the following sequence: order modification (counts as a single order event); order deletion; order entry.

5 Exchange charge

The charge for any automatically executed trade (a fill on the Exchange trading system) depends on how many automatically executed trades, both passive and aggressive and during continuous trading and auctions, have been undertaken by that participant in the current billing period across all segments excluding EUROSETS™ and test segments.

Each trade will be charged in accordance with the banded structure set out in this document.

The charge applies to each fill. In the case of an execution involving an iceberg order, each execution against a peak refresh is considered as a separate fill.

6 Other on Exchange business

Includes all business reported to the Exchange for which there is not a trade report automatically generated by the Exchange trading system.

Exchange charge

Domestic securities and AIM securities

- 7 The charge for any manually reported trade in domestic securities or AIM securities depend on how many manually reports trades subject to a non-zero exchange charge have been undertaken by that member firm in the current billing period across all domestic and AIM segments. Each trade will be charged in accordance with the banded structure set out in this document.

8 International equity market securities

The charge applies to each market-side and client-side report submitted.

A single charge will apply to shapes reported to the Exchange that are deemed to relate to the same underlying trade. Shapes will be deemed to relate to the same underlying trade if the reports submitted

include the same participant, counterparty (when reported through a reporting only system), client identifier, trade date and time, date of report submission, buy/sell, trade price and currency, security, dealing capacity and intended settlement date. When considering client identifiers, any element of the identifier that appears to be sub-account information is ignored.

- 9 Trades in international retail service securities undertaken outside of the international retail service will be charged at the 'other EU securities' or 'other non-EU securities' rate in accordance with their country of incorporation.

10 Other EU securities

International equity market securities will be charged at the 'other EU securities' rate if their country of incorporation is in the EU and the security is not present on the Exchange trading system. No check will be made to determine whether such a security is traded on an EU regulated market.

11 Other non-EU securities

All international equity market securities not listed or quoted on the Exchange trading system or categorised as 'other EU securities' will be categorised as 'other non-EU securities'.

12 Gilt-edged securities

Sales by gilt inter dealer brokers will be charged at one half of the published rate.

13 Stock loans and equity repurchase agreements

The charge applies only to the outward legs and not to the return legs.

Payer rules

- 14 Except for the following member/member trades in gilt-edged securities and fixed interest securities:

- principal/principal trades, where the seller pays one charge;
- agent/agent trades, where each agent pays one charge.

15 Cross trade

Trade reports of trade type 'X' and transaction reports carrying the 'AX' marker are considered to represent cross trades.

General information

All charges are payable monthly in arrears.

All charges are quoted in UK sterling and exclude VAT.

London Stock Exchange plc relies on the data submitted to it to calculate charges. Trades submitted in error may incur a charge. Any invoice queries including, without limitation, any request by a customer for repayment of overpaid charges must be made within three months of the end of the month to which the relevant invoice relates. The customer shall not be entitled to query an invoice and/or claim repayment of any overpaid charges after this period.

London Stock Exchange plc reserves the right to amend any prices at its sole discretion.

For terms and conditions relating to the charges, please refer to the Rules of the London Stock Exchange, the Trading Services Order Forms and User/Subscriber Agreements.
